

Danny Hsu

Front-end Software Engineer

 danny539425@gmail.com  GitHub  LinkedIn  +886 966-508-844

SUMMARY

Software engineer graduating with a B.S. in Computer Science (NTNU, 2026) and 8 months of production experience shipping **Angular/TypeScript** enterprise UIs at VIA Technologies for a TVBS ad-operations platform used by 50+ business users. Comfortable across **React**, **Vue**, and **Angular**, with RESTful API integration, CI/CD deployment (**Docker**, **Nginx**), and cross-team delivery in fast-paced, cross-time-zone environments. Seeking a new-grad or associate software engineering role.

EXPERIENCE

Software Engineer Intern

VIA Technologies, Inc. — IT Application Team, Taipei | *Jun 2025 ~ Jan 2026*

- Replaced a spreadsheet-based ad-operations workflow with a production **Angular/TypeScript** web platform, cutting manual reporting time for 50+ TVBS business users by an estimated at over **70%**.
- Automated KPI calculations (impressions, CTR, list price, sale price) by integrating RESTful APIs across booking, scheduling, and pricing systems, eliminating manual spreadsheet reconciliation for the ad-ops team.
- Built reactive forms and asynchronous validation workflows handling **20+** daily transactions, and implemented responsive Flexbox/Grid layouts supporting both desktop and tablet use.
- Shipped features to production on a **Docker** + **Nginx** CI/CD pipeline on Linux VMs, maintaining zero-downtime deployments across the internship.
- Delivered business-critical features on schedule as one of only two front-end engineers, coordinating daily with PMs and backend engineers across the Taipei and Shenzhen offices.

Software Development Instructor

NTNU CSIE Camp, Taipei *Jul 2023 & Jul 2024*

- Designed and taught a 10-level, project-based HTML/CSS/Python curriculum to 120+ high school students across two annual camps, achieving an **80%+** project completion rate.
- Delivered 12+ hours of live coding, debugging, and full-website-build instruction per camp, mentoring students from zero prior coding experience to a deployed personal site.

EDUCATION

Bachelor of Science in Computer Science and Information Engineering

National Taiwan Normal University (NTNU), Taipei *Sep 2022 ~ Jul 2026 (expected)*

- Relevant Coursework: Data Structures & Algorithms, Software Engineering, Systems Programming, Database Theory, Computer Organization & Architecture, Object-Oriented Analysis & Design.

COMPETITION

Taipei Fall Coding Festival Hackathon

Dept. of Information Technology, Taipei City Government, Taipei *Nov 2025*

- Placed **Top 15 of 80 teams**, advancing to the final round by building a **Vue**-based, Mapbox-powered safety map embedded in Town Pass (Taipei City's official civic app) via Flutter WebView.
- Designed a geolocation feature surfacing the 3 nearest safety points (cooling shelters, AED locations, real-time AQI) and owned the end-to-end UX flow and component architecture under a **24-hour** hackathon deadline.

PROJECTS

Baseball Stats Platform for CPBL

<https://baseball-stats.zeabur.app/>, *May 2025*

- Built and deployed a full-stack web app delivering real-time CPBL game, team, and player statistics, using **React/Next.js** on the frontend and **Python Flask** REST APIs on the backend, hosted on Zeabur.

SKILLS

Languages: TypeScript, JavaScript, Python, C, C++, Java

Frameworks & Libraries: React, Next.js, Vue, Angular, Svelte, Vite, Node.js, Flask, MongoDB

Tools & Platforms: Git, Docker, Nginx, CI/CD, Linux, Vercel, Zeabur, Figma

Practices: UI/UX Design, OOP, Agile / Scrum, RESTful API Integration, Responsive Web Design

Spoken Languages: Mandarin Chinese (Native), English (TOEIC 765)
